### Remark:

The Bodensee-Dampfschiffahrts-Gesellschaft was ordered by the Swiss Schiffahrtsinspektion in 1911 to use a Swiss flag with length = 1.5 x leech length (as flag 3602).

This regulation was finally established in the flag order of 20 May 1951, at first only for the Bodensee, in 1979 also for the Vierwaldstädtersee. The square flag still is used on all the other lakes and on Rhine river navigation.

Switzerland is not a member of the EU. The Swiss flag in the left upper corner of the European flag is not allowed in official use. Still many modelmakers from Switzerland often use that flag in addition to their national flag.

A variant of the connection with the so-called "Inglefieldclip".

In Germany in general as Brummelstick called.

With models smaller than 1:50 this is Production certainly not possibly, therefore use here a lot of modelmaker two small easy wire rings as a substitute.

**Please, follow:** With orders give **the Leech in mm and the order number!**  
(The **leech** is the height in the floor or in the flag rope).  
Then the length arises and is depending on the different ones to formats.
